

Bar Moshe

Software developer and DevOps enthusiast

✉ 1barmoshe1@gmail.com ☎ +972546561465 📍 Israel 🔗 [Linkedin](#) 🐙 [GitHub](#)

Software developer and DevOps enthusiast seeking backend or DevOps roles. Skilled in building scalable applications and cloud solutions.

EXPERIENCE

Software developer, Joomsy 05/2025 – Present
Israel
an early-stage startup with a team of five, I am the primary developer specializing in full-stack development and DevOps. My role involves significant responsibilities across engineering and product development.

Customer support Engineer, Wochit 10/2021 – Present
• Provide technical support for users of a cloud video editor at scale.
• Troubleshoot and resolve issues, ensuring customer satisfaction.
• Collaborate with development teams to improve product features based on user feedback.

EDUCATION

Afeka college of engineering, bachelor of computer science 10/2020 – 08/2023
Developed knowledge across a wide range of topics, from low-level assembly to .NET, along with foundational studies in operating systems, data structures, and algorithms.

Wix, Tel Aviv, DevOps workshop
Gained hands-on experience with Amazon EKS, Kubernetes, Terraform, and microservices through a workshop focused on cloud infrastructure, automation, AWS services, and scalable deployments.

Coding Academy, FullStack BootCamp
An intensive full stack course comprising 16 meetings designed for students with prior coding experience. Proficient in creating responsive web applications using the latest technologies such as Node.js, React, and MongoDB.

PROJECTS

MIDI GPT rest API, Harmonizing Creativity with Technology
Engineered a REST API that merges technology and creativity using a dynamic tech stack. This project highlights my expertise in utilizing Temporal SDK, Python, Golang, TypeScript, Express, OpenAI.

Isralify FullStack project, Spotify clone website
Built a web application mimicking Spotify functionalities using React and Node.js. Integrated music streaming, user authentication, and personalized playlists. Demonstrated skills in full-stack development, API integration, and user experience design.

Data processing service with temporal
<https://temporal.io/code-exchange/cross-language-data-processing-service-with-temporal> 
• Developed a cross-language data processing service using Temporal, showcasing advanced integration capabilities and efficient data handling processes.

PROGRAMING LANGUAGES

I've worked with a wide range of languages and enjoy learning new ones to stay adaptable and up-to-date.
